WHY CHOOSE A BADER® DENTAL CHAIR?

BADER® dental chairs offer the dental professional a guarantee and durability. These are chairs that, thanks to their ergonomics, the patient can rest comfortably. The quality combined with its design make this equipment a comfortable, safe and reliable option.

All Bader® dental chairs include:

- Height-adjustable chair for the dentist.
- Multifunctional pedal, with joystick for motion control.
- Scaler with LED light.
- Light-curing lamp.
- Linak® electromechanical system.
- Italian Drive Air® hoses.

It offers a modular system that is easy to assemble, manageable through its keys and menu for the dentist and assistant. All instruments in the chair can be operated with the multifunctional pedal and motion control.

You can complete the chair design with the wide range of colors to adapt it to your dental clinic. The upholstery is made of microfiber with a viscoelastic interior, fireproof and high resistance, in addition, it lacks seams, which facilitates cleaning the equipment.
